

BIBLICAL COSMOLOGY

Lanthano March 5th, 2026

FROM THE TITLE OF THIS PAPER, YOU PROBABLY THINK that this may be an argument against the globe and in favor of the flat earth model. This is not true. I have researched the flat earth model very well, and I have discovered that most people do not accurately understand a flat-earth'er's position.

However this is not in favor of any model, but that of the Bible. That is, biblical cosmology.

We ought not to make the Bible fit our perspective, but test the Bible and see what it claims to be true. And we should not make our modern science our god.

Here's some good foundation material:

- The 1969 moon landings didn't happen: *Moon Hoax* by Lanthano at: <https://lanthanoresearch.com/pdf.html?file=The%20Moon%20Hoax.pdf&paper=The%20Moon%20Hoax&return=https%3A%2F%2Flanthanoresearch.com%2Fcategory.html%3Fcategory%3Dall>
- Mars rovers are falsified on earth: *Mars Hoax* by Lanthano at: <https://lanthanoresearch.com/pdf.html?file=The%20Mars%20Hoax.pdf&paper=The%20Mars%20Hoax&return=https%3A%2F%2Flanthanoresearch.com%2Fcategory.html%3Fcategory%3Dall>

THE SCRIPTURE

Here, we will read what the Bible has to say about earth, heaven, and cosmology. This will not focus of the physical aspects of whether or not something is true. But will focus of what the Bible has to say about cosmology.

COSMOLOGY IN THE BIBLE

Most people might have been taught how the Bible reinforces our understanding of the universe. I was raised this way. But if you take the whole of what the Bible teaches about earth and cosmology, you get a very different picture of the universe. It is so different that it makes our model an impossibility.

From all the following verses, the Bible shows:

- The earth has a circle shape.
- The earth has ends or extremities.
- The earth has four corners.
- The earth has foundations.
- The earth is supported by pillars.
- The earth is fixed and does not move.
- The heavens are stretched out above the earth.
- There is a firmament separating waters above from waters below.
- There are waters above the heavens.
- The heavens have windows or openings from which rain can come.
- The sun, moon, and stars are placed in the firmament of heaven.
- The sun and moon move across the sky.
- The earth exists above the deep waters.
- There is an underworld beneath the earth where the dead go.
- The earth is established so it cannot be moved.
- The heavens can be rolled up or shaken.
- God sits above the earth looking down on it.

And if this is wrong, find more in the Bible and show me where I am wrong.

THE FIRMAMENT

And God said, Let there be a firmament in the midst of the waters, and let it divide the waters from the waters. And God made the firmament, and divided the waters which were under the firmament from the waters which were above the firmament: and it was so. And God called the firmament Heaven. And the evening and the morning were the second day.

Genesis 1:6-8

In Genesis 1:2 the Bible says: "And the earth was without form, and void; and darkness was upon the face of the deep. And the Spirit of God moved upon the face of the waters."

This imagery is taking us to the depths of "the waters." This is not a picture of nothing. Before the world, before us, there was water. And then in the depths of this water, God clearly says: "Let there be a firmament in the midst of the waters, and let it divide the waters from the waters."

Then the rest of the Bible goes on to make it clear that this firmament, is above us. We exist under it, and the birds fly in it.

And God said, Let there be lights in the firmament of the heaven to divide the day from the night; and let them be for signs, and for seasons, and for days, and years: And let them be for lights in the firmament of the heaven to give light upon the earth: and it was so.

Genesis 1:14-15

And God made two great lights; the greater light to rule the day, and the lesser light to rule the

night: he made the stars also. And God set them in the firmament of the heaven to give light upon the earth, And to rule over the day and over the night, and to divide the light from the darkness: and God saw that it was good.

Genesis 1:16-18

Hast thou with him spread out the sky, which is strong, and as a molten looking glass?

Job 37:18

The heavens declare the glory of God; and the firmament sheweth his handywork.

Psalm 19:1

Praise ye the LORD. Praise God in his sanctuary: praise him in the firmament of his power.

Psalm 150:1

And the likeness of the firmament upon the heads of the living creature was as the colour of the terrible crystal, stretched forth over their heads above. And under the firmament were their wings straight, the one toward the other: every one had two, which covered on this side, and every one had two, which covered on that side, their bodies.

Ezekiel 1:22-23

And there was a voice from the firmament that was over their heads, when they stood, and had let down their wings. And above the firmament that was over their heads was the likeness of a throne, as the appearance of a sapphire stone: and upon the likeness of the throne was the likeness as the appearance of a man above upon it.

Ezekiel 1:25-26

And they that be wise shall shine as the brightness of the firmament; and they that turn many to righteousness as the stars for ever and ever.

Daniel 12:3

THE FOUNDATION

Which shaketh the earth out of her place, and the pillars thereof tremble.

Job 9:6

He stretcheth out the north over the empty place, and hangeth the earth upon nothing.

Job 26:7

This is the strongest verse that exists in the Bible that can be used to argue that Earth floats in space on nothing.

The pillars of heaven tremble and are astonished at his reproof.

Job 26:11

Where wast thou when I laid the foundations of the earth? declare, if thou hast understanding. Who hath laid the measures thereof, if thou knowest? or who hath stretched the line upon it? Whereupon are the foundations thereof fastened? or who laid the corner stone thereof;

Job 38:4-6

The earth is the LORD'S, and the fulness thereof; the world, and they that dwell therein. For he hath founded it upon the seas, and established it upon the floods.

Psalm 24:1-2

The earth and all the inhabitants thereof are dissolved: I bear up the pillars of it. Selah.

Psalm 75:3

The LORD reigneth, he is clothed with majesty; the LORD is clothed with strength, wherewith he hath girded himself: the world also is stablished, that it cannot be moved.

Psalm 93:1

Who laid the foundations of the earth, that it should not be removed for ever.

Psalm 104:5

When he gave to the sea his decree, that the waters should not pass his commandment: when he appointed the foundations of the earth:

Proverbs 8:29

He raiseth up the poor out of the dust, and lifteth up the beggar from the dunghill, to set them among princes, and to make them inherit the throne of glory: for the pillars of the earth are the LORD'S, and he hath set the world upon them.

1 Samuel 2:8

The earth shook and trembled; the foundations also of heaven moved and shook, because he was wroth.

2 Samuel 22:8

THE SHAPE

It is he that sitteth upon the circle of the earth, and the inhabitants thereof are as grasshoppers; that stretcheth out the heavens as a curtain, and spreadeth them out as a tent to dwell in.

Isaiah 40:22

Unlike-like popular opinion, this is not the Bible stating that the Earth is a globe. The word used here when it says "circle" is *chûg*. *Chûg* means: circle, circuit, compass, or horizon. It does not in any way, mean or point to the earth being a sphere.

And this isn't a geuss either, Hebrew has a word for "ball" or "sphere." It's *kaddûr*. *kaddûr* means: ball or round object. In other words, that was the Hebrews word for sphere. You can read this word being used in Isaiah 22:18. If the Lord was trying to say the earth is a sphere, *chûg* would be the wrong word to use.

He hath compassed the waters with bounds, until the day and night come to an end.

Job 26:10

It [earth] is turned as clay to the seal; and they stand as a garment.

Job 38:14

When he prepared the heavens, I was there: when he set a compass upon the face of the depth:

Proverbs 8:27

And after these things I saw four angels standing on the four corners of the earth, holding the four winds of the earth, that the wind should not blow on the earth, nor on the sea, nor on any tree.

Revelation 7:1

And he shall set up an ensign for the nations, and shall assemble the outcasts of Israel, and gather together the dispersed of Judah from the four corners of the earth.

Isaiah 11:12

WATERS

And the earth was without form, and void; and darkness was upon the face of the deep. And the Spirit of God moved upon the face of the waters.

Genesis 1:2

In the six hundredth year of Noah's life, in the second month, the seventeenth day of the month, the same day were all the fountains of the great deep broken up, and the windows of heaven were opened.

Genesis 7:11

The fountains also of the deep and the windows of heaven were stopped, and the rain from heaven was restrained.

Genesis 8:2

By the word of the LORD were the heavens made; and all the host of them by the breath of his mouth. He gathereth the waters of the sea together as an heap: he layeth up the depth in storehouses.

Psalms 33:6-7

Praise him, ye heavens of heavens, and ye waters that be above the heavens.

Psalms 148:4

Bring ye all the tithes into the storehouse, that there may be meat in mine house, and prove me now herewith, saith the LORD of hosts, if I will not open you the windows of heaven, and pour you out a blessing, that there shall not be room enough to receive it.

Malachi 3:10

THE SUN

The sun also ariseth, and the sun goeth down, and hasteth to his place where he arose.

Ecclesiastes 1:5

Then spake Joshua to the LORD in the day when the LORD delivered up the Amorites before the children of Israel, and **he said in the sight of Israel, Sun, stand thou still upon Gibeon; and thou, Moon, in the valley of Ajalon. And the sun stood still, and the moon stayed, until the people had avenged themselves upon their enemies.**

Joshua 10:12-13

Their line is gone out through all the earth, and their words to the end of the world. In them hath he set a tabernacle for the sun, Which is as a bridegroom coming out of his chamber, and rejoiceth as a strong man to run a race. His going forth is from the end of the heaven, and his circuit unto the ends of it: and there is nothing hid from the heat thereof.

Psalms 19:4-6

The sun and moon stood still in their habitation: at the light of thine arrows they went, and at the shining of thy glittering spear.

Habakkuk 3:11

COSMIC COLLAPSE

For the stars of heaven and the constellations thereof shall not give their light: the sun shall be darkened in his going forth, and the moon shall not cause her light to shine.

Isaiah 13:10

This verses likely do not intend to say that the literally stars fall from heaven. The chapter begins by saying: "The burden of Babylon, which Isaiah the son of Amoz did see." The chapter then goes on to describe all these events with cosmic devastating imagery. If this was literal, the the sun would not shine and the stars of heaven would have fallen long ago.

And all the host of heaven shall be dissolved, and the heavens shall be rolled together as a scroll: and all their host shall fall down, as the leaf falleth off from the vine, and as a falling fig from the fig tree.

Isaiah 34:4

The earth shall quake before them; the heavens shall tremble: the sun and the moon shall be dark, and the stars shall withdraw their shining.

Joel 2:10

Immediately after the tribulation of those days shall the sun be darkened, and the moon shall not give her light, and the stars shall fall from heaven, and the powers of the heavens shall be shaken.

Matthew 24:29

And the stars of heaven fell unto the earth, even as a fig tree casteth her untimely figs, when she is shaken of a mighty wind.

Revelation 6:13

And the third angel sounded, and there fell a great star from heaven, burning as it were a lamp, and it fell upon the third part of the rivers, and upon the fountains of waters.

Revelation 8:10

And the fifth angel sounded, and I saw a star fall from heaven unto the earth: and to him was given the key of the bottomless pit.

Revelation 9:1

HEBREW WORLDVIEW

Almost everyone has no idea what the Hebrew people actually thought the world looked like. And we are so arrogant as to assume it must have been something like our model.

But it isn't. Behold, the best example of what the Hebrew people thought of the universe.

Ancient Hebrew Conception of the Universe

The ancient Israelites divided the world into Heaven, Earth, Sea, and the Underworld.

They viewed the sky as a vault resting on foundations—perhaps mountains—with doors and windows that let in the rain. God dwelt above the sky, hidden in cloud and majesty.

The world was viewed as a disk floating on the waters, secured or moored by pillars. The earth was the only known domain—the realm beyond it was considered unknowable.

The Underworld (Sheol) was a watery or dusty prison from which no one returned. Regarded as a physical place beneath the earth, it could be reached only through death.

GRAPHIC BY KARBEL MULTIMEDIA,
COPYRIGHT 2012 LOGOS BIBLE SOFTWARE

This is not the Heliocentric model.

You may not grasp how important this fact is. If the Hebrews got their world view from the Bible, then this is something we have to contend with. And we need to show how our model derives from the scriptures more naturally.

If the Hebrews' worldview shaped the Bible, why would God allow this if the worldview was

wrong? Either way, this is really important and a huge hurdle for those who believe in the Bible and Heliocentric model.

THE PHYSICS

Here, we will explore the issues of the Heliocentric model of the universe. This will not deal with biblical cosmology, but it will explain that the current model is deeply flawed and ultimate trust should not be laid upon it.

SEASONS

We are told that Earth is tilted by about 22 to 24.5 degrees. And the tilt dictates the seasons^{A1}.

Look at the picture to the right. As you can see, the sun's rays hit earth at about 90 degrees at the equator.

As you move toward the north or south pole, that angle decreases. This means that less and less of the sun's rays hit the earth and are instead reflected by the earth's atmosphere into space.

As the earth orbits around the sun, the seasons change. And after six months have passed, the picture is reversed. The sun is on the left side of the earth, and the southern hemisphere receives more rays from the sun than the north.

This model plays out very well. There is however, one place where it doesn't make much sense. But then, if you step outside on an early summer morning when the sun is just over the horizon (at about zero degree angle with the sun), you will feel the sun's warm heat on your face and body. And, while you're outside at midday during the winter (around 40 to 70 degree angle with the sun), you feel nothing.

According to the current Heliocentric model, this doesn't make sense. During the winter at midday, you have a much better angle with the sun, than in the summer at the break of dawn.

You should either feel more of the sun's rays in winter time, or almost nothing in the morning during the summer.

Either way, this is not what we see or experience.

SPEED OF LIGHT

As we all know, stars are hundreds of thousands of light years away from us. With the nearest being around four light years from earth.

If you ask people if there is anyway that these measurements could be wrong or off by large amounts, most people will say no and trust the scientists. In an attempt to have people question the so called settled science, I am going to explain exactly how the calculations are made for the different distances we have in the realm of space.

To the right you can see a visualization of how the calculated distances rely on previous calculated distances. The Moon is the first distance to be discovered, and from there we can estimate the distance to the sun. From the sun we can estimate to other planets in our solar system, and so on.

But most people will be shocked to know that the entire stack of calculations sits on top of an assumption. That assumption is the speed of light.

"The speed of light is not an assumption," you might say, "it is known to be 299,792,458 meters per second."

And while that is technically correct, that's not the one way speed of light. And as you will see, the one way speed of light is very important.

This is how you measure distance with the two way speed of light (using simple numbers for simplicity): you set up a mirror a set distance away (say one foot), and you set up a laser pointed at it. You start a timer when you fire the laser, and you stop it the instant the light reflects and makes it back to the start. If the timer stopped at four seconds, you can now say that the speed of light is exactly $1/2$ foot per second.

The issue is that you don't actually know the one way speed. You know that it takes four seconds to travel two feet (to the mirror and back). And from there, you estimate that the speed there and back is the same. With that, you would get $1/2$ foot per second to and from the mirror. But it could also be one foot per second there, and $1/3$ foot per second back. Either one gives you a four second total trip time. You could even have a $1/4$ foot per second to the mirror, and the light just gets back instantly.

The worst part is that there is no way for us to prove which of these numbers is closest. The one way speed of light is physically impossible for us to measure.

To do it, you would need to set up two clocks. One with the laser pointed toward the second clock, and the second clock set up away from the first.

Make sure they are perfectly in sync. Then stop the first clock when you fire the laser, and stop the second clock when the light gets to it. Then you can compare the difference between the clocks.

With this method, you could have a perfectly measure the one way speed of light.

The only issue with this is that you cannot synchronize any two clocks after separating them. According to Einstein's theories, moving an object will cause it to experience time ever so slightly slower than a stationary object. And this time difference is directly correlated to the one way speed of light.

THE UNSEEN ISSUES OF CALCULATING DISTANCE WITH LIGHT

So synchronizing two clocks separated by a distance is impossible without knowing the one way speed of light. And the one way speed of light is only able to be measured if you can synchronize two clocks separated by a distance.

With this impossibility, you can get really strange issues like with the following situation: you shoot light at an object to see how far away it is. You get around trip time of four seconds, and you have calculated that the two way speed of light is two feet per second, so you find that the distance is about two feet from you.

But it's only actually one foot away.

You assumed that the one way speed of light is 1/2 foot per second. In reality it is 1/3 foot per second in one direction and 1 foot per second in another.

The two way speed of light is known, the one way speed of light is impossible to find, and when measuring distances, we can never be sure that an unknown distance is accurate if we're using light as the gauge^{C1}.

ASTRONOMICAL DISTANCES

The base of the ladder (visualized to the right) begins with the Moon, whose distance is measured directly by lasers. Beams of light are sent to the Moon and reflected back, and the round-trip time reveals the distance once the speed of light is applied. This gives a precise foundation for all larger measurements.

With the Moon's distance known, astronomers use it to refine the distance to the Sun. By observing how the Moon and planets move against the background sky and applying the laws of orbital motion, they can calculate the scale of Earth's orbit around the Sun. This defines one astronomical unit (AU), a key reference length for all further space measurements.

Using the Sun's distance as a standard, the distances to other planets can be determined. When the positions of planets are measured from Earth at different points in their orbits, geometry and timing reveal how far each one lies in relation to the Sun and Earth. These

relative measurements expand the known size of the solar system.

Once the solar system's scale is fixed, it becomes the base for finding the distances to nearby stars. The key tool is parallax, the tiny shift in a star's position when viewed from opposite sides of Earth's orbit. Because the size of Earth's orbit is already known from the previous steps, this angular shift can be converted into a physical distance using simple trigonometry.

Finally, distances to faraway galaxies are measured by comparing them to nearby stars.

Astronomers use "standard candles," such as variable stars whose true brightness is well understood. By matching these with similar stars in other galaxies, they can extend the distance scale far beyond what parallax can reach, completing the cosmic distance ladder^{C2}.

But, because the Moon's distance from Earth is calculated with the use of lasers, the numbers are only correct if the one way speed of light is the same in all directions.

All the numbers you have been given for all of space are built on assumptions.

WHAT IS A STAR?

"Look, a shiny thing in the sky. I think it's the same thing as our sun because I don't think the sun is special at all and we live in a fully naturalistic world."

That's how we know what a star is. If you go to NASA, you can find a bunch of images of stars and stuff. But everything from NASA is provably fake. NASA's posts and images are always edited or fabricated.

With NASA hopefully out of the way, you don't have very much to go off of for stars. When you actually zoom in on a star you see this.

These photos were captured with a Nikon p900 camera

This looks nothing like what we are shown by NASA. How does NASA deal with this issue? They don't. Through all my research, I have never found any statement from NASA that has any explanation for what we see with our own cameras.

FLAT AND NON-ROTATING

Numerous NASA technical publications include explicit references to a "flat, non-rotating Earth" assumption. These statements appear primarily in the context of aircraft dynamics, simulation modeling, and flight control analysis.

This raises the question: if the earth is round and spinning, why would NASA use a flat, nonrotating model for their flight simulations?

NASA Technical Paper 19890007066 (1988)

Antoniewicz, R. F.

User's Manual for Aircraft Simulation Model

The mathematical model is based on six-degree-of-freedom nonlinear equations of motion. **These equations are developed assuming a rigid vehicle operating over a flat, nonrotating earth**, and are expressed in body-axis and inertial coordinate systems appropriate for simulation purposes...

The simulation employs standard flight dynamic equations with flat, nonrotating earth assumptions, which simplify the formulation by neglecting the effects of Earth curvature and rotation for the class of problems considered...

NASA Reference Publication 1207 (1988)

Duke, E. L., et al.

Derivation and Definition of a Linear Aircraft Model

The equations of motion describing the dynamic behavior of a rigid aircraft of constant mass are derived **under the assumption that the vehicle is flying over a flat, nonrotating earth**. The derivation makes no assumption concerning the magnitude of the perturbations from a trim condition...

This report documents the derivation and definition of a linear aircraft model. The model is obtained by linearizing **the nonlinear equations of motion for a rigid aircraft of constant mass flying over a flat, nonrotating earth**...

NASA Technical Reports Server (NTRS Index Evidence)

NASA Technical Reports Server

A linear **model of an aircraft system is derived and defined for a rigid vehicle flying over a flat, nonrotating earth**. The formulation is intended for use in control system design and analysis...

NASA Aircraft Dynamics Modeling (Repeated Formulation Language)

(Compiled from NASA technical reports and simulation descriptions)

The nonlinear equations of motion describing aircraft behavior are formulated with respect to a flat, nonrotating Earth, allowing simplification of inertial terms and elimination of rotational effects for the purposes of control analysis...

In many flight dynamics applications, a model frequently used is that of a flat, nonrotating Earth, which is valid for trajectories of limited range where curvature and rotational effects are negligible...

NASA Flight and Rocket Modeling Studies (Summarized References)

In several NASA studies involving launch trajectories, wind compensation, and aircraft performance, calculations **were performed assuming a flat, non-rotating earth, as the curvature and rotational effects were not significant for the scenarios being analyzed...**

NASA Report (1991) – AIAA Controls Design Challenge Aircraft Model

The nonlinear equations of motion used in this model are general six-degree-of-freedom equations representing **the flight dynamics of a rigid aircraft flying in a stationary atmosphere over a flat, nonrotating Earth.**

NASA Report (1978) – Aircraft Landing in Variable Wind Fields

The earth is flat and non-rotating... The acceleration of gravity is constant... The airframe is a rigid body...

There are a total of about 40 unique NASA documents that reference the flat, non-rotating assumption. This is not a solid absolute proof of the earth being flat, or non-rotating. But it is extremely odd. To NASA's credit, they claim to do this because it simplifies the math involved. In the end, this is extremely curious. But not much of a proof.

Praise God for giving me a questioning mind. We ought not to believe without reason. And even if I am considered an idiot for the questions I ask, the questions are worth the asking.

“If any of you lack wisdom, let him ask of God, that giveth to all men liberally, and upbraideth not; and it shall be given him.”

James 1:5

“Prove all things; hold fast that which is good.”

1 Thessalonians 5:21
